

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

South Carolina 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	18.95	24.37	59
Community Utilization per 1,000 population	7,900,059	18.87	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.19	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	-	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	55.6%	51.2%	58
Employed (percent with Employment Data)**	890,626	22.4%	27.2%	58

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

This table uses data from URS Table 6.

State Notes:

State Psychiatric Hospitals Changes in hospital admissions, discharges, and length of stay figures from the previous years related to the Hospital System's adoption of policies to address the the risk of COVID-19 Pandemic spread.

Other Psychiatric Inpatient None

Residential Treatment Centers None

Overall None

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022

South Carolina

Reporting Period: 7/1/2021 To: 6/30/2022

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	96.0%	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	94.3%	69.0%	74.0%	57

Co-occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	28.4%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	2.7%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	28.9%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	2.9%	10.5%	3.0%	56

Note:

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Method used combines primary and secondary DSM-V diagnoses codes for substance use disorders and DSM-V mental health diagnoses codes meeting the federal criteria for SED and SMI.

General Notes FY 2022

South Carolina

URS Table Number	General Notes
5A, 5B	Revised payment source strategy to account for payment source transfers (taking in to account primary and secondary payment sources for patients with more than one payment source) for services provided during the reporting year. Prior strategy focused exclusively on the first payment source billed for services provided during the year.
5A, 5B	Changed the reporting methodology to look at payment transfers beyond the initial billing attempt. This strategy provides an improved method for examining how service charges are transferred from one payment source to another.
7	Other funds \$16,773,660 (2022) \$37,575,622 (2021)- has to do with the Gaffney and Florence VA construction grants that ended in SFY 2021. EBP and ESMI \$911,222 (2022) \$718,450 (2021)- the increase includes the MHBG COVID-19 expenditures, FEP training for Spartanburg MHC, and the Cost of living increases on salaries.
7A	CSC Evidence based Practices and First Episode Psychosis \$611,962(2022) \$398,156 (2021) FEP training for Spartanburg MHC, and the Cost of living increases on salaries.
7A	CSC Evidence based Practices and First Episode Psychosis 611,962(2022) \$398,156 (2021) FEP training for Spartanburg MHC was paid on federal funds due to staff turnover and required training of the new hires. There was also cost of living increases on salaries during the timeline of the grant. As shown on table 7, \$3,040 which is COVID-19 Block grant funds are included in the total of \$611,962. The difference from 2021 to 2022 for Other ESMI finding was staff turnover, approximately \$21,000.
14A	Our centers report seeing four additional patients whose race was reported as Hawaiian/Pacific Islander during the reporting year.
16B	Call center data does not contain an age indicator.
20B	The reporting year saw our hospitals admit and discharge fewer patients due to ongoing COVID protocols. The re-admission rate is generally very small. The growth appears large, but the value of re-admissions is very small (N=10 individuals readmitted within 180 days of discharge).

Errata Sheet to the 2022 URS Output Tables

This page includes clarifications and corrections to the 2022 URS Output Tables.
